Presentation Title

BREAKTHROUGH POWER: How Quantum-Leap New Energy Inventions Can Transform Our World.

This presentation offers a behind-the-scenes look at the world of visionary inventors and brave scientists who are on the frontier of remarkable new clean energy technologies. Told from the perspective of the presenter's personal experiences with these pioneers and the new energy field, Garbon relates the story of the challenges they have weathered in the face of staunch resistance from powerful entrenched vested interests. He calls for concurrent evolution in human consciousness and energy technology to address our pressing global challenges, making an appeal for grassroots activism and a "tidal wave of wisdom" to collectively usher in a New Energy Era.

Presenter Biography

Joel Garbon serves as president of the educational nonprofit **The New Energy Movement** (www.NewEnergyMovement.org) and is a founding member of **New Energy Congress** (www.NewEnergyCongress.org), which maintains a continuously updated and publicly viewable database of the "Top 100" most promising breakthrough energy technologies. He is the author of an historic legislative draft titled "Energy Innovation Act of 2007" which serves as a template for new energy legislation on the federal, state, local, and international levels. The legislation's provisions call for urgent and serious public support for research and development of breakthrough energy technologies.

Garbon is co-author with Jeane Manning (author of the highly-regarded book "The Coming Energy Revolution") of a new book titled ***BREAKTHROUGH POWER: How Quantum-Leap New Energy Inventions Can Transform Our World*** which chronicles the challenges, opportunities, and progress in the new energy technology field.
